

brennan green

biography

DJ and producer Brennan Green is associated with a number of current trends in dance music – house, disco, nu-disco, leftfield, cosmic, baleric, post punk, electrofunk etc.– but no fashion or sub-sub-genre adequately describes Green's trademark sound.

His productions on independent dance labels such as Daniel Wang's BaliHu, Wurst Records and his own label, Chinatown, have an organic feel that is rare in modern dance music. Green's vinyl-only releases combine both acoustic and electronic instrumentation to unearth irresistible grooves, syncopated rhythms and hypnotic basslines. As a remixer Brennan has also found a voice all his own with popular remixes for Liquid Liquid, Lindstrom, Runaway and DFA. Most recently his remix of Damian Lazarus' Neverending (Get Physical) was picked for Pete Tong's Essential New Tune on Radio One.

Brennan's all night long, genre-bending DJ-sets are sure to rock any dancefloor taking a crowd through sounds that span disco, house, techno, dub and rock. His New York parties Pop Your Funk (APT, 01-04) and Junky Blues (Flamingo East, 99-01) were instrumental in pioneering the current underground disco invasion and since then he has toured extensively through Japan, Australia, Europe, North/South America and Russia playing at events as diverse as New York's P.S.1, London's Fabric & Horse Meat Disco, Tokyo's Yellow, Sydney's Madracket and many of the world's best underground parties. He's Currently holding down a monthly residency at NYC's east village jazz outpost Nublu (04-now)

For the last year Brennan has been in the studio producing and mixing for the resurrected Arthur Russell/Loose Joints project, Arthur's Landing for Strut/K7 UK. A collective of ex-Arthur Russell bandmates and performers covering all of Arthur's disco works. His own Chinatown imprint is set to release 2 12" singles from this project including the seminal classic Is It All Over My Face featuring vocals from Hercules and Love Affair vocalist Nomi Ruez.
